

## MOBILITY 2035

*We Plan to Keep You Moving*

# You're Invited!

An ever-growing population equals ever-increasing transportation needs. By the year 2035, there will be over 600,000 more people in Bexar County. **But how will our area grow?**

- Will growth continue to spread outside of Loop 1604?
- Will growth become concentrated along new high-capacity transit corridors?
- Will new in-fill developments attract growth inside Loop 1604?

**How would you like to see our community grow?** The San Antonio-Bexar County Metropolitan Planning Organization (MPO) is updating the Metropolitan Transportation Plan (MTP) for 2035. The MTP is the basic framework for all of our long-range transportation planning. We need your help in selecting a growth scenario (or combination of scenarios) which will then be used to select roadway, transit, rideshare, bicycle and pedestrian improvement projects for funding over the next 25 years.

While realizing that significant governmental policy changes would be needed to successfully manage regional growth, it is important to understand how different types of growth affect our transportation system and ultimately our community's quality of life. **Come learn more about the various growth scenarios developed for the region and offer your opinions on the direction we should take in the future.**
